Subject: [EXT] Digital Euro

Dear Mr Cipollone,

For the commercial, industrial and trade sectors in Germany the creation of a digital euro is an important undertaking. Hence, the development process should take into account relevant use cases for businesses so that necessary functionalities can be included. As far as we know, this has not been done so far.

Therefore, we are advocating for a digital euro which is also made available as a token and would appreciate your support.

Yours sincerely,

[REDACTED]
